

Job Opportunity

Job Title: Software Engineer (Full Stack Java Developer)

Job Context

We are looking for Java Developers to join an existing team of motivated developers working on Core Banking Solutions (CBS) and the emerging Financial Technology (FinTech) applications leveraging the CBS. This position requires that you should have strong back-end and front-end development experience, primarily in Core Java, Spring Boot Application Frameworks, JavaScript /Typescript and the Angular Framework.

Candidates having experience in Java micro services and KAFKA streaming platform will have added advantage.

Requirements

- 1-2 years of Software Development Experience in: Software Design & Development, Spring Frameworks, Git/SVN, Core Java/XML, JavaScript/Typescript, Angular Framework.
- Database Design and Development Experience in RDBMS, e.g. Oracle. PostgreSQL.
- Detail oriented with strong analytical and problem solving skills.
- Good skills in writing test cases to develop bug free robust applications.
- Responsible for capturing and understanding the end-user needs.
- Design and develop integration test cases, detailed components and unit test cases.
- Should be willing to contribute in team environment.
- A fresh graduate having extraordinary ability and willing to take learning challenges is welcome to apply.

Education

Bachelor's degree in Computer Science or relevant discipline.
